# THE HARMONY OF BODY, MIND AND NATURE

FOUNDERS  
TIMES

*The quest for an answer to how health, a well-balanced mind and natural beauty could form a harmonious entity, led to the launch of Farfalla.*

*The Farfalla founders were young and eager to experiment and in some ways pioneers, trying out things which were still considered exotic in the 1970s. They practised yoga and macrobiotics, produced their own tofu and kombucha – continually searching for health and inner peace.*

*This search took the first Farfalla generation to meet people around the world who taught them that the use of plants could bring body and mind in harmony.*

*Thanks to the use of our aroma therapeutic knowledge our products have the amazing ability to affect our mental health as well as our body.*

*It also fascinates us to discover that the diversity of potent plant raw materials allows an almost boundless spectrum, making our product range an indispensable tool box for well-being.*

## THE FASCINATION GOES ON...

*The vision of the Farfalla founders flows now into the 2nd generation.*

*Malvin Richard, grown up in a hippie community, has taken over the management of the company. He is supported by an experienced team as well as by new colleagues in perpetuating the values and ideals of assisting humankind with the power of plants to increase their personal well-being, as the general basis for happiness and satisfaction.*

*More than just a brand name: The butterfly symbolises for us:*

METAMORPHOSIS & REGENERATION  
BEAUTY & FEMININITY  
INDIVIDUALITY & DIVERSITY  
NATURE & ECOLOGY  
VITALITY  
...FOLLOW THE BUTTERFLY...

# THE INDIVIDUAL PATH TO WELL-BEING

*Our travels take us to meet people all around the world who teach us that the use of plants can bring body and mind in harmony.*

*Encounters with people all over the globe have shown us how many different ways can lead to an increase in well-being.*

*On this basis we have brought together a unique collection which conveys inspiration and gives guidance as to how the aromatic plants and their products can help each individual to feel content and healthy.*

*Those who follow the butterfly now-days will quickly notice: never before have natural cosmetics and aroma care been as individual, as holistic, as inspirational.*

**Ethnobotany** is the study of a region's plants and their practical uses through the traditional knowledge of a local culture and people - an inexhaustible source which teaches us how plants all over the world were used for medicinal purposes, cosmetics and customs.

Experimental tests as well as numerous studies support reports of healing from the use of essential oils. They have proved their value in health care, in daily well-being or for mental or physical disorders.

# THE FARFALLA MIDWIFE GRANT

We give babies all over the world a healthy start in life – [www.followthebutterfly.com](http://www.followthebutterfly.com)

When we hear stories of women working for our cooperatives in Madagascar we realise what is behind the naked figures. In many developing countries almost 1 in 100 mothers still die at birth and often the baby too. Siblings survive without a mother.

In Europe the mortality rate has been greatly reduced thanks to the professional care of the mothers during pregnancy, among other things by well-trained midwives. Still now 1 woman dies out of 10000 at birth. This is a 100 times smaller

risk than in the Sahel. The reason: there are not enough midwives in the poorest countries of the world. Especially in rural areas there are no prenatal check-ups for the women and they give birth without any medicinal assistance. A skilled midwife could take care of about 500 pregnancies from the beginning. The survival rate of mother and child could be decisively increased by early diagnosis of complications as well as professional care during and after birth.

We have founded the farfalla midwife grant in order to reduce the maternal mortality rate in the poorest countries of the world in a tangible and direct way. With every farfalla product sold a midwife's training for several years is financed in especially affected countries. This midwife takes care of mothers and their babies before, during and after the birth. For a healthy start in life – all over the world.

# HOW GINGER FINDS ITS WAY FROM MADAGASCAR TO OUR BATHROOM

Exemplary journey of a farfalla raw material

80% OF OUR RAW MATERIALS COME FROM ORGANIC PRODUCTION AND WILD GROWING PLANTS. IN OUR OWN ORGANIC FAIRTRADE PROJECT IN MADAGASCAR WE CULTIVATE, I.A., ORGANIC GINGER.

## ORGANIC NURSERY

Our small ginger seedlings are well looked after in the nursery by local organic agronomists. The respect for nature, resources and mankind plays an important role here.

## ORGANIC CULTIVATION

The young plants are now ready to be transplanted into selected organic fields belonging to our 2000 small farmers. These partners have many advantages such as guaranteed purchases and fair trade premiums; even the whole village profits from our social commitment.

## HARVEST

When the ginger plants are fully grown, they are harvested and taken to the distillery. The organic farmers are rewarded with fair wages for tending the plants with such care.

## DISTILLATION

Our local partners distil the aromatic rhizomes releasing at last the coveted essential oil. It pleases our farmers to hear that the guests are surprised at the pungent spiciness of their rhizomes (and use them for a kind of Madagascan pesto).

## TRANSPORT

The organic ginger oil is bottled hermetically and then is ready for its long journey to Switzerland to us in Uster/Zurich.

## QUALITY CONTROL

Now for it! As soon as the organic ginger oil arrives, its quality (physically and analytically) is tested in our laboratory.

## PRODUKTION

The essential oil is then filled up in our own production or used further in a natural cosmetic formulation for shower gel, body oil, air fresheners etc.

## INTERMEDIATE CONTROL

The finished product must pass another quality control (physically & bacteriologically).

## COMPLETION

Success! We fill up the 100% natural ginger product and pack it up for the next journey.

## DISPATCH

The journey of our ginger is not over when sent to one of our branches, partner stores or put on our online shop; it still has to find its way into our bathroom.

# A FARFALLA LABEL

From sowing and harvesting to distillation, pressing or maceration of the freshly harvested plants – our farming partners all over the world share our values in terms of ecology and humanity and meet our high quality standards. Our “Grand Cru” label is awarded to oils whose producers, in addition to their passion for ecological growing, offer social or ecological added value.

## IRAN

The project “roses instead of poppies” opens up a new perspective for a mountain region and promotes

cultural and social projects (orphansages, among others).

## INDIA

Our farming partner employs single mothers and disadvantaged women; he also provides education for their children (palmarosa, lemonGrass, among others).

## MADAGASCAR

The organic fairtrade cooperative supports more than 2000 small farmers and their whole region with social benefits and improved infrastructures, like schools, medi-

cal centers (ylang ylang, ravintsara, ginger and many others).

## MOROCCO

An exemplary social company preserves the Berbers’ age-old practices in exploiting the argan tree and strengthens the position of women (argan oil).

## SOUTH OF FRANCE

Dedicated wild plants collecting women keep an old tradition alive in a structurally weak region (wild mountain lavender).

Take or pay contracts, workers protection, medical care, a new school, instructions in ecological farming for yield increase in their self-sustaining gardens – these services, offered by the ecological fairtrade project in Madagascar, do not only benefit the small farmers and the project’s employees, they extend to all the inhabitants of the region.
